Do/Be/Feel List

In this section, it contains the current version of Do/Be/Feel Lists to track our process for designing. In this version, we explained what we have updated and why we have to update.

After discussion with supervisor peter, we separate the functions with the quality and emotion / concerns.

For the do-be-feel-who lists
• Do: What should the software do? (Functional goals)
• Be: How should it be done? (Quality goals)
• Feel: Emotional (or social) considerations (Emotional goals)
• Who: Users involved (Roles)

Do/Be/Feel Lists _ Version 2

Do - Function	Be - Quality	Feel - Emotion /Concern	Who - Users /Stakeholders
login / register	• Reliable • Easy to access	• secure • special	ALL
switch on/off the radio station	• Convenient (easy to manage content) • Visual (good use of radio station interface) • Fast and efficient	• engaged • sense of control	ALL
